

USER INTERFACE

Team ID	PNT2022TMID29840
Project Name	Skill/Job Recommender Application

USER INTERFACE TO INTERACT WITH APPLICATION:

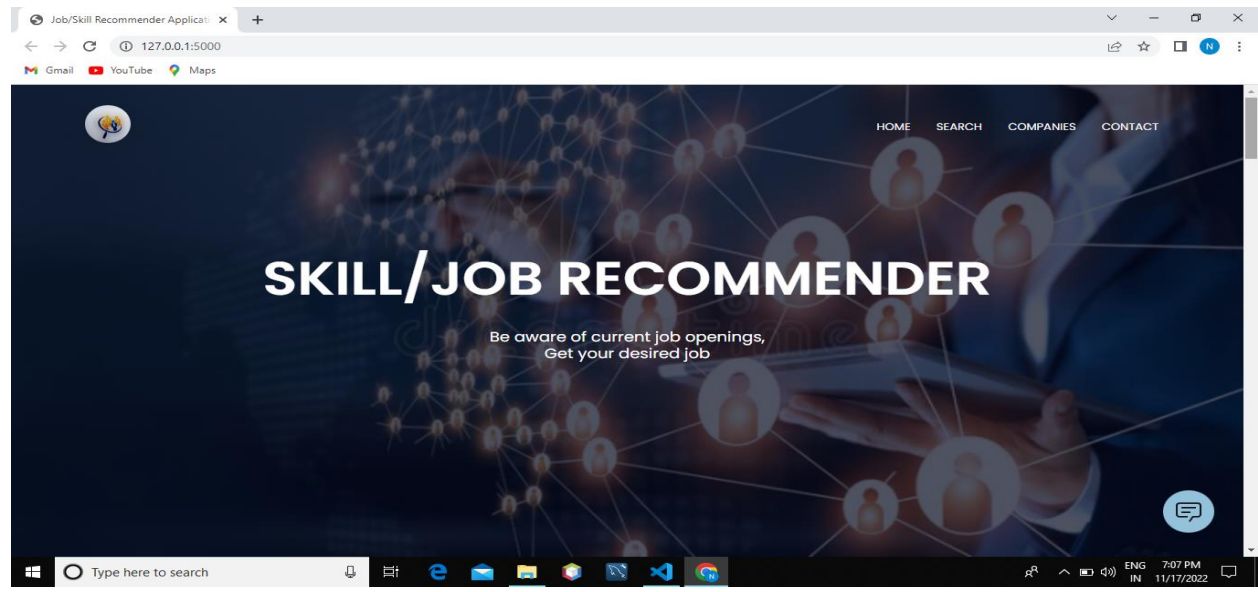

The screenshot displays the Visual Studio Code interface for a Flask application. The Explorer panel on the left shows the project structure, including files like `app.py`, `companies.html`, `index.html`, and `search1.html`. The main editor window shows the `app.py` file with the following code:

```
1 import email
2 from pyexpat import model
3 from tkinter import S
4 from flask import Flask, render_template, request, redirect, url_for
5 from flask import Flask, render_template, request, redirect, session
6 import sqlite3 as sql
7
8 app = Flask(__name__)
9
10 @app.route('/')
11
12 def index():
13     return render_template('index.html')
14
15
16
17 @app.route('/search1')
18 def search1():
19     return render_template('search1.html')
20
21 @app.route('/contact')
22 def contact():
23     return render_template('contact.html')
24
25 @app.route('/companyinfo')
```

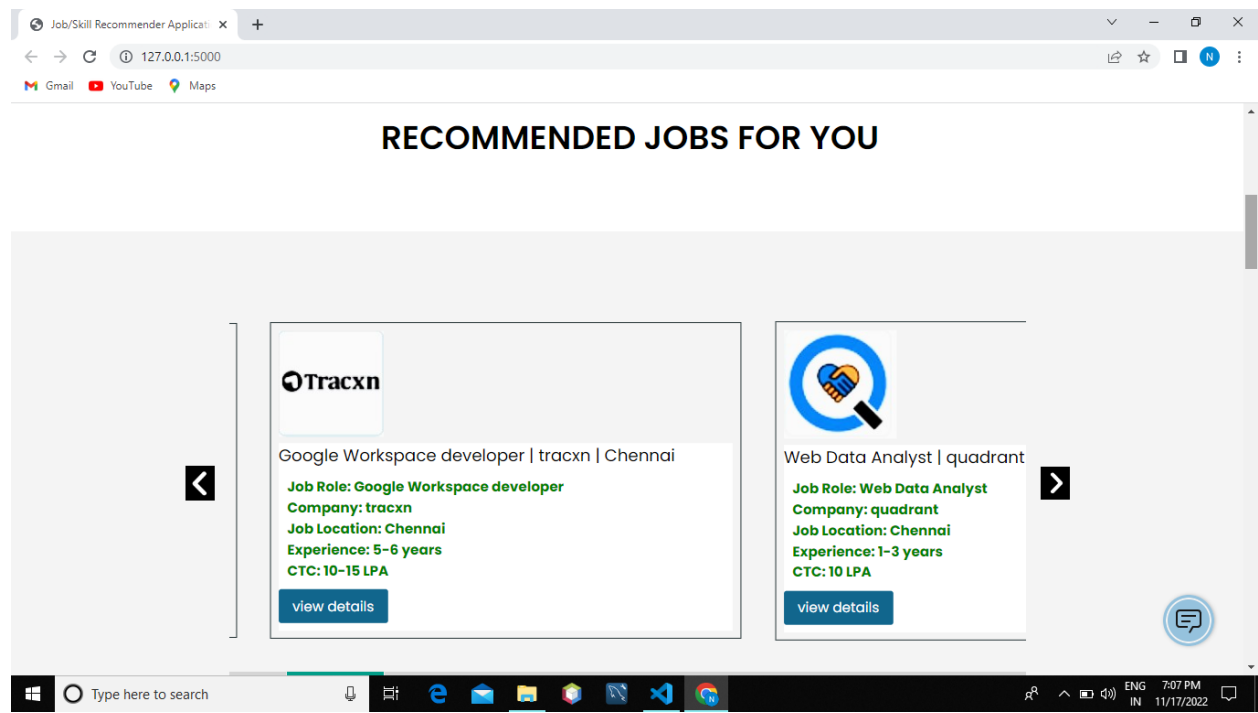

The Terminal panel at the bottom shows the command `flask run` being executed, resulting in the following output:

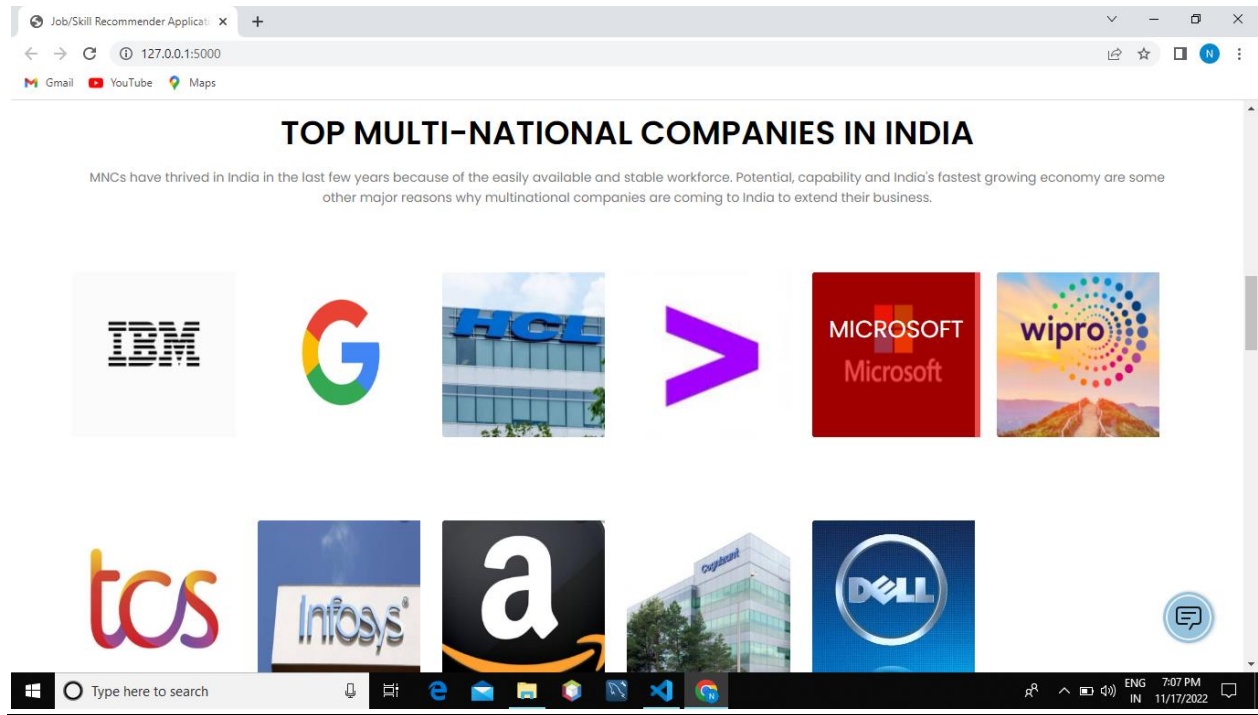

```
PS C:\Users\Nandhini kesavan\Desktop\Project Development Phase\Sprint-2> flask run
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
```
